

Partnering with Industry Leaders

To deliver meaningful solutions to our clients

Built on industry best practices and a robust global network, Inmarsat Government designs, implements and manages scalable satellite solutions that support data, voice and video applications. The ability to integrate our own private, global, terrestrial MPLS network with any existing infrastructure allows us to create custom solutions that can meet virtually any communication challenge.

At Inmarsat Government, we are proud of our partnerships and recognize the important role they play in allowing us to better serve our existing customers, as well as reach out to new and emerging markets. Because our partners are an extension of the Inmarsat Government family, each one shares our commitment to quality and vision to deliver secure, reliable, rapidly deployable, mission-critical communications to a variety of customers, world-wide. We are always interested in exploring the potential for new strategic partnerships. So whether you are looking to attract a new customer base, expand your presence globally or form a strategic alliance, we would like to hear from you.
